

Body Changes

Your body is starting to

change.

Sometimes your penis might go

hard. This is called an erection.

Your penis and bottom are

private. They are covered by

pants.

Pubic hair will grow on

your penis and testicles.

Hair will start to grow on

your

armpits,

on your legs, on

your

chest

and on

your

face.

You will start to get hot and

smell on your armpits. You

need to wash your body with

soap or shower gel every day.

Your clothes will smell.

You will need to put on

clean clothes everyday.

Your voice may start to

change and sound different.

You may get spots on your face.

Sometimes your hair will look

and feel greasy. You will need to

wash your hair with shampoo.

Remember to wash:

- face

- armpits

- penis

- bottom

- feet
