

Wet Dreams

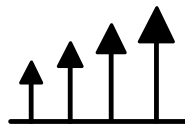

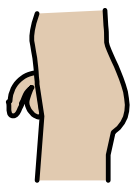

Your body is changing.

Your penis is growing.

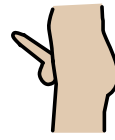

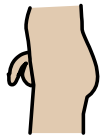

Pubic hair is growing around

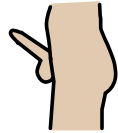

your penis.

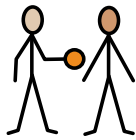

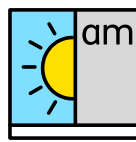

Sometimes your penis will go hard.

This is called an erection.

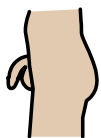

Sometimes your bed might feel wet

and sticky in the morning.

This is sperm that sometimes comes out of

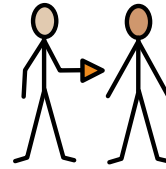

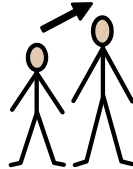

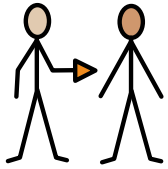

your penis.

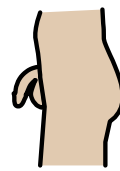

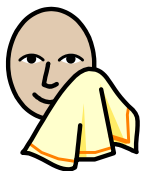

This is ok. It happens because

you are growing up. You will need to

have a shower, a bath or use a wet

flannel to wash your penis.
